

Thank you for downloading!

Some General Tips (where applicable):

- *For cut files:* SVG files are best for importing into cutting machine software. PNG files for digital stickers work well with Cricut®'s print & cut feature. (Import your image using the "Complex" setting, and make sure to resize as needed.) Keep in mind that more intricate designs are easier to cut and weed at medium to large sizes. Remember to "mirror" images before cutting on iron-on vinyl or HTV.
- *For digital scrapbooking papers, clip art, coloring pages, and printables:* JPEG and PNG files are ideal for printing or use in image editing software when creating digital layouts. PNGs are usually for images with a transparent background. Letter-size PDF pages might also be included for easier printing.
- Colors may vary slightly on different screens and printers.
