

# How to Use Cricut Joy Insert Card Envelope SVGs

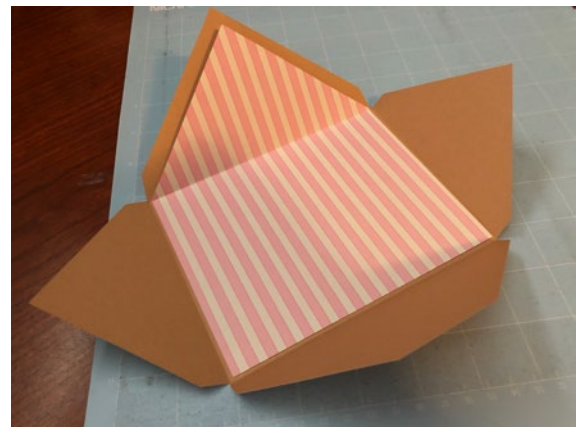

These SVG cut files will produce an A2 size envelope for a 4.25 x 5.5 inch finished card, such as those found in Cricut Joy insert card kits, although they can be scaled to whatever you want. There are two SVG files, one for the envelope and one for the liner.

To use:

- First upload your SVGs to Design Space. Place the piece you are cutting first on your canvas. The liner should be sized to 5.625 x 7.25 inches. The envelope should be sized to 11 x 10.25 inches.
- For either file, ungroup the cut shape and the lines. Select the lines and set the Operation to Score as shown below. (If you are not using a scoring stylus, delete the lines and create your own folds manually after cutting.)

- Select your shape and lines and Attach. Make sure your scoring stylus is inserted into the A tool holder. Then cut! Create both your envelope and liner pieces
- Fold along the scoring lines. Glue your liner in place first. Then fold in the sides of the envelope, and fold up and glue the bottom.

**Please remember that these are digital files, and no physical item will be shipped. Colors may vary slightly on different screens and printers.**

*Some general tips about file types (where applicable):*

- *For cut files:* **SVG** files are best for importing into cutting machine software. **PNG**s can also be used on most machines. **PNG** digital stickers work well with a cutting machine's print & cut feature.
- *For digital papers, clip art, coloring pages, and printables:* **JPEG** and **PNG** files are ideal for printing or use in art apps and software when working digitally. The **PNG** format is usually used when a transparent background is needed. Letter-size **PDF** pages might also be included for easier printing.
